1 Welcome

Giving you the best user experience is our priority. Therefore, we do our best to provide you with the clearest and the most complete documentation possible.

For this purpose, feel free to leave additional feedback by using the dedicated feature on the Help Portal. Please write some details about your suggestion. Based on SAP user feedbacks, we improve your documentation and deliver Frequently Asked Questions (FAQs) about all aspects of working with SAP Convergent Charging efficiently. We complete these solutions with our best time-saving and task-completion tips and tricks.

You can also visit our page Community Questions and Answers for SAP Convergent Charging.

2 SAP Convergent Charging

With **SAP Convergent Charging**, you bring competitive subscription and metered services to market with flexible pricing management.

To stay competitive, you need to properly define and apply the right prices to products and services, and be able to adapt quickly should market conditions change. Nowadays end customers want to subscribe to the perfect offer and manage their expenses in real time. Furthermore, partners in your ecosystem need comprehensive revenue-sharing systems. Transparency, agility, and flexibility are key.

SAP Convergent Charging helps you quickly define and change subscription services and related partner revenue sharing models. It supports millions of subscribers and is able to meter, rate, and charge each customer event in real time. By allowing non-IT personnel to quickly make pricing changes, service providers can create competitive pricing offers to seize market opportunities. And that translates into increased profitability, end-customer loyalty, and a strong competitive edge in a highly demanding marketplace.

SAP Convergent Charging helps you to:

- Design and change end-customer pricing and partner revenue-sharing models quickly.
- Give subscribers control over their spending.
- Calculate recurring- and usage-based fees and subscription charges in real time or batch.
- Operate with low latency, very high volume, and high availability.

Features

SAP Convergent Charging (SAP CC) includes the following main capabilities:

- Service/product pricing and modeling
- Online and offline rating
- Partner revenue share calculation
- Online account balance management
- Allowance management for services or products

> → Remember
>
> You bring competitive subscription and metered services to market with flexible pricing management.

Business Benefits

- Lower TCO with pricing consolidation and calculation of partner-revenue share, along with customer pricing
- Increase business agility by consolidating multiple services and lines of business onto a single, high-volume platform

- Quicken time-to-market by designing pricing and offers without needing to code
- Drive market share growth by empowering pricing managers to bring innovative pricing offers to market faster than the competition
- Improve the customer experience through real-time monitoring and account management
- Improve customer retention with tailored pricing models that reward loyalty
- Reduce number of applications by bringing service pricing and charging functions onto a single platform

2.1 Pricing Definition

With SAP Convergent Charging (SAP CC), you can implement a wide range of **pricing models**, including subscription-based and usage-based pricing. SAP CC supports recurring, one-time, and usage charges, and is suitable for B2C, B2B, and partner business models.

You can apply these pricing models across multiple industries, such as telecommunications, postal services, and high-tech sectors.

Pricing models are managed using charge plans and price tables, enabling flexibility to compute prices for any kind of services and products. These pricing models are combined into a subscription product in Subscription Order Management.

2.2 Flexible and Rapid Business Model Design

SAP Convergent Charging helps you ensure a fast time to market for your new chargeable services or products.

With SAP Convergent Charging you:

- Rapidly design subscription-, recurring-, and usage-based pricing for your chargeable services or products
- Quickly launch new commercial offers with the necessary pricing configuration in SAP Convergent Charging.
- Implement and run pricing configuration and logic based on reusable settings.
- Easily maintain the pricing configuration.

> → Remember
>
> It brings immense business agility to deliver value to your end customers.

2.3 Monetization of All Services and Revenue Models

SAP Convergent Charging is designed to allow the monetization of any type of service from Data SMS, and Voice to Wifi, Cloud, Saas, M2M, IoT, and OTT partnerships.

You implement and run revenue sharing models with the same ease as revenue generation models.

You manage your channel and partner types with a simple pricing configuration.

> → Tip
>
> Getting prices right is crucial for the success of your business.

2.4 Individual or Pooled Allowance Management

You can define and manage allowances that are quotas of service for individual end customers or groups of customers, including B2B scenarios. SAP Convergent Charging (SAP CC) allows you to set up both individual and shared allowances.

With SAP Convergent Charging, you:

- Manage service quotas and add-ons with greater flexibility than ever before.
- Gain ability to launch new personalized, customized add-ons and promotions in record time.
- Give your end-customers the ability to buy, stack, and share any type of service quotas across all their devices, family members, and business units, and to make changes to those allocations in real time.
- Improve end-customer experience by integrating allowance capabilities into customer self-service portals.

Related Information

Features, Capabilities, and Concepts
Allowance Management
For more information and user assistance, consult the Application Help for SAP Convergent Charging.

2.5 Rating of Consumption, Recurring and One-Time Events

With SAP Convergent Charging (SAP CC), you can **rate consumption, recurring, and one-time events**, including both event-based and session-based scenarios.

SAP CC supports rating of consumption items from SAP Convergent Mediation by DigitalRoute or SAP Convergent Invoicing, and resulting billable items can be loaded into SAP Convergent Invoicing for billing purposes.

2.6 Contract Charging and Recharging

Contract Charging

With SAP Convergent Charging (SAP CC), you can **rate consumption, recurring, and one-time events and generate fees to charge a contract**. Contract charging allows scenarios requiring counters and allowances.

In addition, you can define customer-specific prices at the contract level.

Contract Recharging

You can rerate consumption, recurring, and one-time events at the contract level. This is particularly useful for correcting errors or adjusting charges after contract changes.

2.7 IoT Ready

SAP Convergent Charging can easily support IoT (Internet of Things) and other connected devices with high-volume, automated, and transparent processing across usage-event and financial postings.

> → Remember
>
> Adopt and monetize the IoT technology that is creating business opportunities in a wide range of industries.

2.8 Prepaid, Postpaid, and Hybrid Payment Model Support

SAP Convergent Charging supports various payment models:

- Prepaid
- Postpaid
- Hybrid

You manage all subscriber types and segments with ease.

2.9 Spending Controls and Alerts

You manage real-time customer engagement for your end customers.

Related Information

Features, Capabilities, and Concepts
Spending Status Monitoring
For more information and user assistance, consult the Application Help for SAP Convergent Charging.

2.10 Batch and Real-Time Rating and Charging

Related Information

Features, Capabilities, and Concepts
Real-Time Credit Control
For more information and user assistance, consult the Application Help for SAP Convergent Charging.

2.11 Scalability and High Availability

SAP Convergent Charging provides comprehensive fault and disaster recovery support, as well as high availability for business continuity (rating and charging operations in real time).

SAP Convergent Charging is scalable by adding or removing instances to/from the SAP Convergent Charging system. As soon as you get at least 2 instances of same type, then you can reach high availability (HA) if the distribution of those instances are spread on different physical hosts.

SAP Convergent Charging provides different high-availability architectures and setups that you implement in your SAP system landscape to achieve high availability depending on your SLO (service level objectives) and high availability strategy.

Related Information

Features, Capabilities, and Concepts
High Availability
High Volume Management
For more information and user assistance, consult the Application Help for SAP Convergent Charging.

2.12 Open APIs and Interfaces

SAP Convergent Charging has open APIs and interfaces (refer to the Java/XML API Reference (Core Library) documentation) that allow seamless integrations. It connects to any customer management or provisioning systems (CRM, self-care), metered data systems (mediation, SCP, soft switches), financial systems (legacy billing, invoicing, revenue recognition, ERPs, General Ledgers), data warehouse systems.

> → Remember
>
> You plug SAP Convergent Charging into upstream and downstream systems using standard interfaces.

3 SAP BRIM Solutions

Innovate with agility and increase transparency across the entire revenue management process from customer engagement to revenue recognition with agile, scalable and highly-automated billing, invoicing and revenue management solutions.

Our on-premise, SAP BRIM solution gives you the power to work more profitably in a complex partner ecosystem, reselling their products and services and sharing revenue accordingly. You'll also be able to accurately anticipate the effect of new pricing models and create targeted offers that combine both products and services.

Billing and Revenue Innovation Management enables you to create profitable digital services with flexible pricing and watertight revenue management. The SAP BRIM software is based on the following integrated SAP components and products:

- SAP ERP (in SAP Business Suite 7i2016) or SAP S/4HANA On-Premise Editions (1511, 1610, 1709, 1809, 1909, 2020, 2021, or more recent)
- SAP Convergent Charging (SAP CC)
- SAP Convergent Mediation by DigitalRoute

The SAP BRIM solution helps you:

- Innovate your business models so that you can deliver a better end-customer experience.
- Monetize subscription- and usage-based services in real time.
- Share revenues with partners of your business network.
- Streamline your high-volume revenue management processes.

Key Benefits

Move from selling products to selling services and physical goods bundled with services	Operationalize your business model with ease	Scale business models supporting high-volume processing
Offer your end-customers outcomes based on subscriptions and real-time usage-based services, while supporting revenuesharing models across your extended ecosystem.	Enable any variant or combination of prepaid and pay-as-you-go business models with rules-based, intelligent automation of invoicing and accounting processes.	Support the Internet of Things (IoT) and connected devices with highvolume, automated, and transparent processing across usage-event and financial postings.

Key Capabilities

Subscription-based order management:

- Capture and monitor subscription orders to ensure delivery and billing accuracy.
- Address contract changes, renewals, extensions, and billing cycles automatically.
- Manage master agreements, including invoicing hierarchies, specialized catalog.

Collection, enrichment and management of usage events:

- Capture, streamline, and consolidate usage and event data for pricing and charging.
- Support growing volumes of usage data with unlimited scalability.
- Enable open graphical workflows with rapid configuration.

Agile charging supporting your business models:

- Design customer-centric, subscription, and usagebased pricing models such as revenue sharing.
- Simplify the creation, management, and execution of allowances and entitlements.
- Allow seamless integration across your current digital environment with flexible APIs.

Consolidate invoicing for all services:

- Improve customer satisfaction and reduce costly questions with clear and accurate invoicing..
- Consolidate billing information from various areas and partners into a single, clear summary.
- Tailor services and pricing with comprehensive invoice-level discounting capabilities.

Flexible document management:

- Create and personalize business communications – in both digital and hardcopy formats – with ease.
- Customize messaging and formats for bank statements, bills, invoices, and receipts.
- Provide document management self-services that do not require IT intervention.

Comprehensive customer financial management:

- Manage revenue flow with intelligent, highly automated receivables and payments handling.
- Give your agents a full view of financial customer data.
- Provide better, more personalized support for sophisticated credit and collections.

Service Users [page 28]

5.1 Decision Makers

Decision makers are project participants who evaluate an SAP software product (or an *SAP Solution*) and decide on the purchase and the implementation project GO/NO GO. They are persons responsible for making this buying decision.

Decision makers need information about the:

- Mere features and functions of SAP Convergent Charging (SAP CC)
- Functional delta

During the evaluation phase, they consult our SAP product documentation and user assistance:

- The *Getting Started Guide* document
- What's New in SAP Convergent Charging 2025 FPS 2
- Application Help
- Integration guides [page 14] for the integrated *SAP Solutions* based on SAP S/4HANA or SAP ERP (in SAP Business Suite).

5.2 Implementers

Implementers are IT consultants and developers [page 26] that are members of the implementation team that is responsible for the implementation project of the SAP Convergent Charging software product.

In a development SAP system landscape, implementers may have the "administrator" SAP CC role in order to install, configure, and operate with the SAP CC systems.

Implementation and Integration Project

Before the go-live phase, the project team hands over the production systems to the (IT) Operation Team [page 24] and the technical support to the relevant support specialists [page 27].

> **Note**
>
> Implementers can provide some functional guidance when technical support is not possible.

Member of: "Implementation Team" or "Project Team"

During the (project) implementation phase, they consult our SAP product documentation and user assistance:

- The *Getting Started Guide* document
- What's New in SAP Convergent Charging 2025 FPS 2
- Application Help
- Integration guides [page 14] for the integrated *SAP Solutions* based on SAP S/4HANA or SAP ERP (in SAP Business Suite).
- Security Guide

Mid of the implementation phase, they operate with QA and pre-production SAP system landscapes.

Related Information

Developers [page 26]

5.3 SAP CC Pricing Specialists

Pricing specialists are typical individual users of SAP Convergent Charging.

An SAP CC pricing specialist is a typical individual user of SAP Convergent Charging who is responsible for designing and configuring the pricing settings for the chargeable services or products to monetize by implementing subscription- and usage-based pricing models.

- **Analyze** how to design some pricing logic with SAP Convergent Charging, given that there are typically several ways for implementing a given requirement, based on price plans and price tables.
- **Model and design** the pricing configuration for the chargeable services or products of your company.

- **Configure, release, and put into production** easy-to-maintain price plans and tables with SAP Convergent Charging to meet new business needs (*pricing policy* defined by the marketing team).
- **Maintain** existing price plans and tables to configure the marketing and pricing policy evolutions or in case of issues.

Goal	In SAP Convergent Charging	With Cockpit	With Former Data Model
Analysis	With SAP CC 2025, the pricing specialists have a flexible solution to analyze how to design some pricing logic for the chargeable services or products and how to model the necessary pricing settings and data in SAP Convergent Charging. They compare the various business/technical requirements with all capabilities/features of SAP CC.	As of release 2020, the pricing specialists benefit from a simplified and renewed vision and concepts introduced in SAP Convergent Charging Cockpit to analyze how to model and design the implementation depending on the business requirements. Rate plans specify how to charge end customers for the use of a service or product.	With the former and legacy Data Model, the pricing specialists analyze how to model and design the implementation based on charges combined in offers to subscribe to. Tier tables and translation tables are multicolumn data tables that enable implementing and running tier-based pricing or multidimensional pricing.
Modeling and Design	Several implementations are possible and the pricing specialists determine and optimize the best modeling and design by taken into account the business requirements (pricing policy) from the marketing team and features of SAP Convergent Charging.	Based on rate plans and mapping/range tables in pricing catalogs, on provider contracts and subscriber accounts for end customers and subscribers, the pricing specialists model the implementation and translate the pricing policy from the marketing team to pricing configurations in SAP Convergent Charging for their chargeable services or products.	Based on charges, offers and tier/translation tables in pricing catalogs, subscriptions and subscriber accounts for end customers and subscribers, the pricing specialists model the implementation and translate the pricing policy from the marketing team to pricing configurations in SAP Convergent Charging for their chargeable services or products.
Pricing Configuration	With Core Tool, the pricing specialists configure, test, and release **easy-to-maintain charge plans, allowance plans, and mapping/range tables** with SAP Convergent Charging to meet new business needs.	With Cockpit, the pricing specialists configure, test, and release **easy-to-maintain rate plans and mapping/range tables** with SAP Convergent Charging to meet new business needs.	With Core Tool, the pricing specialists configure, test, and release **easy-to-maintain reusable charges, offers, and tier/translation tables** with SAP Convergent Charging to meet new business needs.
Maintenance and Evolutions	The pricing specialists maintain existing charge plans and mapping/range tables to configure the marketing and pricing policy evolutions or in case of pricing issues in charge plans or mapping/range tables. They retire obsolete charge plans.	The pricing specialists maintain existing rate plans and tables to configure the marketing and pricing policy evolutions or in case of pricing issues in rate plans or tables. They retire obsolete rate plans.	The pricing specialists maintain existing charges, offers, and tier/translation tables to configure the marketing and pricing policy evolutions or in case of pricing issues in charges or tables.

Primary Activities

- Analyze, translate, model, and design the pricing policy for your chargeable services or products
- Prototype and demo price plans and price tables
- Configure and maintain price plans and tables
- Test and debug price plans and tables
- Notify other stakeholders when price plans are ready for validation
- Investigate and fix price plan and table issues

They consult our SAP product documentation and user assistance:

- What's New in SAP Convergent Charging 2025 FPS 2
- Primary Help for Cockpit
- Primary Help for Core Tool
- Application Help

5.4 Pricing Specialists for Price Data

Pricing specialists for price data are typical individual users who configure and maintain some price data in a selection of data tables configured and stored in SAP Convergent Charging (SAP CC).

An SAP CC pricing specialist for price data is a typical individual user of SAP Convergent Charging who is responsible for configuring and maintaining some price data in a subset of mapping, range, and agreement tables. The tables that are available depend on permissions that grant access rights.

The **Pricing Specialists for Price Data** are responsible for maintaining prices in specific tables configured in SAP Convergent Charging (SAP CC).

Their key goals are:

- **Optimizing pricing strategies** to maximize profitability and revenue.
- **Monitoring market trends and competition** to ensure competitive pricing.
- **Implementing effective pricing structures** to enhance end-customer satisfaction and loyalty.

Their job responsibilities include:

- Analyzing market trends and competitive pricing to develop effective pricing strategies.
- Monitoring and adjusting prices to maximize profitability while maintaining end-customer satisfaction.
- Collaborating with sales and marketing teams to develop pricing promotions and optimize product pricing.

They must have a user account in SAP Convergent Charging (SAP CC).

This user account must be assigned to a given client defined the SAP Convergent Charging (SAP CC) system.

They must be granted the role "Pricing Specialist - Price Data".

In the environment of SAP CC, they work with the following apps:

- Manage Mapping Tables

- Manage Range Tables

They consult our SAP product documentation and user assistance:

- Primary Help for Cockpit

5.5 Billing Specialists for Rating (Customer Sales Representatives)

> **Note**
>
> As of version 2025 FPS 1, the billing specialist for rating is responsible for resolving issues with item files not loaded or partially loaded into the destination SAP systems (SAP S/4HANA, SAP ERP, or SAP CRM). These item files are generated by the rating process.

Billing specialists for rating and **customer sales representatives (CSRs)** are typical individual users of SAP Convergent Charging who are responsible for the rating and rerating processes.

A billing specialist for rating (aka Customer sales representatives (CSR)) is responsible for managing the rating process, manually executing the rating process and checking the results, and resolving rating-related issues.

Tasks include viewing subscriber accounts and tables, viewing contracts and allowances, activating contracts, performing manual rating and checking results, and monitoring the rating process.

Their key goals are:

- **Managing the rating process efficiently** by executing it manually, ensuring accuracy and timeliness of results.
- **Resolving rating-related issues promptly and effectively** to maintain customer satisfaction and minimize disruptions.
- **Monitoring the rating process continuously** to identify and address any anomalies or discrepancies in a timely manner.

Their job responsibilities include:

- Managing the rating process: Oversee the entire rating process, ensuring accuracy and efficiency in executing manual rating and resolving any rating-related issues.
- Executing the rating process: Manually perform rating tasks, including viewing subscriber accounts and contracts, activating contracts, and monitoring the rating process.
- Checking and resolving issues: Verify rating results for accuracy, identify and resolve any rating-related issues promptly to maintain data integrity and customer satisfaction.

Their needs are:

- Efficiently manage the rating process and ensure accurate execution.
- Resolve rating-related issues promptly and effectively.
- Access and view subscriber accounts, contracts, and allowances easily.
- Perform a manual rating and thoroughly check the results for accuracy.
- Monitor the rating process to ensure smooth operations and identify any potential issues.

They must have a user account in SAP Convergent Charging (SAP CC).

This user account must be assigned to a given client defined the SAP Convergent Charging (SAP CC) system.

They must be granted the role "Billing Specialist - Rating" aka "Customer Sales Representative (CSR)".

In the environment of SAP CC, they work with the following applications:

- SAP CC Cockpit:
  - Process a Chargeable Item (for manual rating operations)
  - Resolve Item Loading Issues (for item files with a loading issue or unreadable) (as of version 2025 FPS 1)
  - Display Subscriber Accounts (as of version 2023 FPS 2) and Display Contracts (as of version 2023 FPS 2)
  - Plans: Manage Rate Plans (as of version 2020 FPS 0) and Manage Allowance Plans (as of version 2021 FPS 1)
  - Data lookup tables: Manage Mapping Tables and Manage Range Tables
  - Table classes: Manage Mapping Table Classes and Manage Range Table Classes
- SAP CC Core Tool (for rerating, display of contract data)

They consult our SAP product documentation and user assistance:

- Primary Help for Cockpit
- Primary Help for Core Tool

5.6 Operation Team Members

Operation Team Members are individual members of a technical operations team and ensure the ongoing support and management of the SAP system landscapes. They manage the operation supervision for the SAP CC systems. Some members are the SAP CC system admistrators [page 25].

Member of: "Operations Team", "SAP Operation Team", or "IT Operation Team"

During the operation phase, they consult our SAP product documentation and user assistance:

- Administration and Operation Guide
- Log Message Reference and Error Troubleshooting

Related Information

SAP CC System Administrators [page 25]

5.7 SAP CC System Administrators

System administrators are individual users who administer the SAP CC systems in the SAP system landscapes.

An SAP CC system administrator is a typical user of SAP Convergent Charging (SAP CC) who is responsible for administering SAP CC systems and applications.

Their key goals are:

- **Configuring quickly high performances SAP CC systems**.
- **Ensuring the system runs smoothly 24h7**.
- Ensuring security and compliance by enforcing security policies and specifying security measures.

Their job responsibilities include:

- Installation, system maintenance, and upgrade project of the SAP CC systems in their technical environments
- System configuration
- Continuous tuning of the SAP CC system to adapt to the evolving workload on the SAP CC system
- Technical monitoring
- System audit (security)
- Client configuration (as of release 2025)

They must have a user account in SAP Convergent Charging (SAP CC).

In the environment of SAP CC, they work with the following applications:

- SAP CC Cockpit:
  - Manage System Parameters
  - Manage Clients (as of version 2025 FPS 0)
- SAP CC Core Tool

They consult our SAP product documentation and user assistance:

- What's New in SAP Convergent Charging 2025 FPS 2
- Installation and Maintenance Guide
- Administration and Operation Guide
- Security Guide
- Primary Help for Cockpit

5.8 User Administrators

User administrators are individual users who manage the declaration and definition of user accounts for SAP CC users.

An SAP CC user administrator is a typical individual user of SAP Convergent Charging who is responsible for managing user accounts.

SAP CC user administrators are responsible for creating user accounts, assigning appropriate roles and permissions, providing necessary access credentials, and managing user accounts, their roles and permissions throughout their lifecycle – from onboarding to offboarding – to ensure that users can access the necessary resources while maintaining security.

Tasks include creating SAP CC user accounts, assigning roles and permissions to user accounts, monitoring user activity, modifying permissions (as of version 2023 FPS 1), locking user accounts, and deleting user accounts.

User management is part of the technical operations.

Their key goals are:

- **Managing the SAP CC user accounts** by creating, modifying, and deleting user accounts in the SAP Convergent Charging (SAP CC) systems in their SAP system landscapes.
- **Ensuring security and compliance** by enforcing security policies and ensuring that user accounts are properly configured to protect sensitive data and resources.
- **Providing SAP CC user with support** by troubleshooting and resolving user issues promptly to minimize disruptions to productivity and ensure a positive user experience.

Their job responsibilities include:

- Managing the user accounts and permissions within the company's Convergent Charging system as needed.
- Ensuring that user access is appropriate and aligned with security policies.
- Handling the password resets, account lockouts, and other user-related issues.

They must have a user account in SAP Convergent Charging (SAP CC).

In the environment of SAP CC, they work with the following applications:

- SAP CC Cockpit:
  - Manage User Accounts (as of version 2023 FPS 2)
  - Manage Permissions (as of version 2023 FPS 1)
- SAP CC Core Tool

They consult our SAP product documentation and user assistance:

- Administration and Operation Guide
- Security Guide
- Primary Help for Cockpit (as of version 2023 FPS 1)
- Primary Help for Core Tool

5.9 Developers

Developers are members of the implementation and integration team and model, design, and develop the integration between SAP Convergent Charging with custom applications or systems. Several technical interfaces and several technologies are possible.

Member of: "Implementation Team"

During the (project) implementation phase, they consult our SAP product documentation and user assistance:

- Security Guide
- SOAP Web Services Documentation
- Java/XML API Reference (Core Library)
- Error Code Reference
- Application Help

Related Information

Implementers [page 20]

5.10 Support Specialists

Support specialists are individual members of a support organization and provide technical support, technical guidance, SAP system interventions, and root cause analysis (RCA).

The support organization is our SAP Support Team or your own technical support and support desk with your internal support employees or a dedicated partner team.

> ⓘ Note
>
> - Specialists from SAP Support Team deliver SAP software patches.
> - **Technical experts** from third line support (L3) resolve issues that are typically difficult or subtle. They can detect and fix issues in the source code.

For your local support organizations, SAP Convergent Charging provides the technical feature *Management of SAP CC Remote Support Users*. These typical users have limited authorizations to the systems, user interfaces, and available operations.

- **Technical support engineers** work with the SAP CC systems.
- **Business support engineers** work with a given client within the SAP CC system. Their user account is assigned to a given client.

> ⓘ Note
>
> Support specialists provide some technical guidance. Implementers [page 20] and IT consultants from project teams provide you with functional or business guidance.

Member of: "SAP Support Team", "Local Support Organization"

Whatever the life cycle phase (*implementation phase*, *operation phase*, or **upgrade phase**) for your SAP CC system landscape, they consult our SAP product documentation and user assistance:

- Log Message Reference and Error Troubleshooting
- Performance Metric Reference
- Error Code Reference

5.11 Service Users

Service users are typical SAP CC users for machines, systems, and applications that connect to and communicate with the SAP Convergent Charging systems through different *technical interfaces*.

6 Product Availability Matrix (PAM) for SAP CC 2025

→ Recommendation

Always refer to the up-to-date technical release information in the Product Availability Matrix (PAM) for SAP Convergent Charging 2025 (aka SAP CC 2025).

See: Product Availability Matrix (PAM) for SAP Convergent Charging 2025.

To run SAP CC in a cloud infrastructure, see:

- Hyperscaler Infrastructures for SAP CC [page 30]
- SAP HANA Enterprise Cloud for SAP CC [page 30]

Through the Product Availability Matrix (PAM), SAP regularly publishes information about SAP CC software releases:

- Release types
- Maintenance durations (end of mainstream maintenance, extensions)
- Planned availability
- Upgrade paths from replaced releases
- List of maintenance versions (Feature Package Stacks, Support Package Stacks)

The PAM also offers information about platform availability, including:

- Database platforms
- Operating systems
- JSE (Java Standard Edition) versions
- Web browsers
- JEE (Java Enterprise Edition) versions

It is important in the evaluation, implementation, operations, and upgrade phases of your SAP CC software product.

Architecture

6.1 Hyperscaler Infrastructures for SAP CC

SAP Convergent Charging supports different hyperscalers that run data centers and provide certified Infrastructure-as-a-Service (IaaS) platforms.

Infrastructure	See SAP Note...
Amazon Web Services (AWS)	2835758
Google Cloud Platform (GCP)	2923505
Microsoft Azure	2820026

6.2 SAP HANA Enterprise Cloud for SAP CC

SAP HANA Enterprise Cloud (SAP HEC) is a fully scalable and secure service that offers a privately managed cloud environment. SAP Convergent Charging is available in the SAP HEC infrastructure. See:

- SAP HANA Enterprise Cloud
- Help Portal for SAP HANA Enterprise Cloud

Infrastructure	See SAP Note...
SAP HANA Enterprise Cloud	2008832

7 Downloads

SAP Software

SAP Convergent Charging (SAP CC) enables downloading the **installation media** from the SAP Software Download Center (SWDC) on SAP Support Portal.

See: Downloading the Installation Materials

> → Tip
>
> Use the following direct links for SAP Convergent Charging 2025:
>
> - Installations and Upgrades for SAP Convergent Charging 2025
> - Maintenance and Innovations (FPS, SPS, Patch) for SAP Convergent Charging 2025

User Assistance and Product Documentation

SAP Convergent Charging (SAP CC) enables downloading the PDF files that compose its product documentation and user assistance.

On SAP Help Portal, just view a document and click *Download PDF* to download the complete PDF file (Full Document) or start customizing a selection of topics.

> → Tip
>
> On the SAP CC product page (help.sap.com/cc2025), click *Download PDFs* to select multiple PDF files to download at once.
